Professional Summary

I'm an experienced Information Technology Analyst with expertise in strategic system improvements, change management, and cross-functional project delivery. With proven track record in developing and maintaining expert knowledge of complex IT systems while driving continuous improvement initiatives that enhance operational efficiency, I have demonstrated success in coordinating software releases, implementing configuration changes, and managing system upgrades across multi-stakeholder environments. I possess strong foundation in database management, API development, and system integration with experience in mentoring technical teams and providing leadership across strategic technology initiatives.

Core Technical Competencies

Systems Architecture & Administration

- **Database Technologies:** Microsoft SQL Server, MySQL, Oracle
- **System Integration:** REST API development, SOAP Web Services, cross-platform data sharing
- **Change management:** Software releases, configuration changes, hotfix deployments
- **System Testing:** UAT planning/execution, test case development, impact analysis

Strategic Project Leadership

- **Requirements Analysis:** Business process analysis, technical specification development
- **Stakeholder Coordination:** Cross-team collaboration, vendor management, project delivery
- **Documentation & Training:** Technical documentation, staff training programs, knowledge transfer
- **Process Improvement:** Gap analysis, workflow optimisation, digital transformation

Development & Cloud Platforms

- **Programming Languages:** Python, JavaScript, HTML, Java
- **Web Technologies:** React, Angular, CMS platforms, MapBox SDKs
- **Cloud Infrastructure:** Microsoft Azure, AWS, Cloudflare, Vercel
- **Version Control:** Git, GitHub workflows, CI/CD processes

Analytics & Reporting

- **Business Intelligence:** Crystal Reports, SSRS, GA Dashboards
- **Data Analysis:** Advanced Excel functions, data visualisations, KPI monitoring
- **System Monitoring:** Performance analysis, operational reporting, issue tracking

Professional Experience

Information Technology Analyst | MetaByte Tech, Sydney Nov 2023 – Nov 2025

- **Operational Delivery:** Execute strategic improvement projects, implementing system configuration changes that enhanced operational efficiency by 25%.
- **Compliance Management:** Developed comprehensive change management processes including CAB documentation and formal approval workflows.
- **Stakeholder Collaboration:** Provide technical consultation to stakeholders on system capabilities and optimization opportunities.
- **Mentorship:** Mentor junior technical staff on system administration procedures and troubleshooting methodologies.

Web and Support Analyst | WhistleOut Australia, Sydney Oct 2022 – Nov 2023

- **Infrastructure Security:** Optimized website security using Cloudflare, implementing automated threat response systems.
- **Cloud Administration:** Provided technical support and Azure Active Directory user access management.
- **System Administration:** Maintained IT hardware and software across multiple departments to ensure high reliability.

IT Support Analyst | NSW Department of Education, Bathurst Jan 2022 – Oct 2022

- **Continuous Improvement:** Developed and delivered staff training programs that reduced helpdesk incident volume by 30%.
- **Disaster Recovery & Patching:** Managed regular maintenance schedules, system updates, and backup procedures for critical systems serving 500+ users.

Junior System Administrator | Western NSW LHD, Orange Oct 2021 – Dec 2021

- **System Upgrades:** Supported organization-wide Windows Server upgrades and performed system compatibility testing.
- **Technical Documentation:** Created detailed technical documentation and conducted onboarding for new system implementations.

Education

- **Bachelor of Science in Information Technology** | UTS | Feb 2022
Major: Networking and Cybersecurity
- **Diploma of Information Technology** | UTS College | Jun 2019
- **Master of Business Information Systems** | AIHE | Nov 2025
